Response to RFP MA-RFP-2026-017

Meridian Analytics Pvt. Ltd., Hyderabad - supply of 100 business laptops

Submission date: 7 October 2026

Contact: Karan Mehra, Sales Head | Email: karan@brightpathtech.example | Phone: +91 40 5550 2202

1. Executive Summary and Understanding of the Requirement

1.1 Summary of our offer

BrightPath Tech is pleased to offer 100 BrightPath Value 14 laptops to Meridian Analytics Pvt. Ltd. The laptops are delivered in 3 weeks. The total price is Rs 48,97,000 including GST, which is comfortably inside the budget guideline and gives Meridian the lowest cost per employee in this purchase.

We believe that a laptop for a new employee should be simple, light and ready to use. The BrightPath Value 14 does exactly that. It has a modern processor, a fast solid-state drive, a clear screen and the Windows 11 Pro operating system that Meridian has asked for. Our focus is on giving customers what they need at a fair price and without unnecessary extras.

Many of our customers are growing businesses that need to equip a group of new colleagues quickly. They do not want to learn about processors and chipsets. They want to know that the laptops will arrive, that they will work, and that someone will help if a question comes up. We try to make buying laptops as easy as buying any other everyday item for the office.

1.2 Our understanding of Meridian's requirement

Meridian is growing and wants to equip its new employees with good laptops. We understand that the laptops should be 14-inch, with a Core i5 class processor, 16 GB of memory and a 512 GB drive. They should be quick to deliver, set up with the company software and tagged for the asset register. We also understand that Meridian cares about security and about a sensible price.

A new employee's first day sets the tone for their time at a company. A laptop that starts quickly, connects to the network and has the right applications makes a good impression. Our offer is built around this simple idea, and we have kept the proposal as direct as possible so that Meridian's team can read it quickly.

1.3 Why choose us

BrightPath Tech is a young and energetic company. We were founded in 2023 by a small group of friends who had worked in computer retail and wanted to offer businesses a friendlier and faster way to buy laptops. We have kept our overheads low, and we pass those savings on to our customers in the form of keen prices.

Our delivery time of 3 weeks is much shorter than the 8 weeks that Meridian has allowed. We keep stock of our laptops in our own warehouse, and we work with a courier that knows Hyderabad well. Customers tell us that they like dealing with a small team that answers the phone, and that is something we intend to keep as we grow.

We value honesty, speed and simplicity. We try to say what we will do, and then do it. We do not hide behind long documents, and we believe that a customer should always know who to call. These values guide how we run our company and how we have written this response.

Our company culture is informal but disciplined. Every morning the whole team meets for ten minutes to look at the orders of the day, and anyone can raise a worry. We believe that small teams who talk to each other often make fewer mistakes than large teams who write long reports to each other. That belief is the reason our proposal is brief and to the point.

2. Proposed Solution (Laptop Model and Specifications)

2.1 Laptop model and specification table

Component	BrightPath Value 14
Processor	Intel Core i5 class processor
Memory	16 GB
Storage	512 GB SSD
Display	14-inch Full HD screen
Battery	Up to 8 hours
Weight	Light and portable
Ports	USB, HDMI and audio ports
Wireless	Wi-Fi and Bluetooth
Operating system	Windows 11 Pro
Security hardware	TPM and built-in protection

2.2 Performance, battery life and build quality

The BrightPath Value 14 is designed for everyday office work. It handles email, documents, spreadsheets, web browsing and video calls without slowing down. The solid-state drive means that the laptop starts in seconds and opens applications quickly, which employees notice and appreciate every day.

The battery lasts up to 8 hours, which is enough for most working days. Actual battery life depends on how the laptop is used, on screen brightness and on the programs that are running. Employees who work near a power socket will find that the battery is rarely a concern.

The laptop has a durable build that is made to cope with daily use in the office and on the move. The case feels solid, the hinges are firm and the keyboard is comfortable for long typing sessions. We chose this model because it gives a good balance between strength and weight, and because our customers who have used it have been satisfied with how it feels.

The screen is bright and sharp enough for reading documents and watching presentations. The keyboard has a standard layout with a number pad on the right, which many finance and operations users prefer. The touchpad is large and responds smoothly. A built-in webcam and microphone are included for meetings.

The speakers are clear enough for voice calls, and the webcam sits at the top of the screen so that the user looks straight at the other person. The laptop is quiet in normal use, which is helpful in open offices where many people work close together. The charger is compact and easy to carry in a bag, and the lid closes with a firm and satisfying feel.

2.3 Fit with Meridian's environment

We will install Meridian's software image on the laptops and add an asset tag to each one. Our technicians are used to working with Windows 11 Pro and with standard business applications. The laptops can be joined to Meridian's systems, and we will work with Meridian's team to make sure that sign-in works.

Extra units of the same model are normally available from our stock, so Meridian can add new employees later without changing the type of laptop. This keeps the fleet consistent and makes support easier. Prices for later orders are agreed at the time of order.

We think that a standard laptop for all new employees is the simplest way to manage a fleet. Support staff learn one model, spare chargers fit every laptop and users can help each other when something is unclear. A single model also makes it easier to plan for the day when the laptops are replaced, because the whole group reaches the end of its useful life at about the same time.

Accessories such as chargers, mice and bags are available on request. We are happy to talk about what Meridian needs and to suggest sensible options for different types of employee, from office staff to people who travel often.

2.4 Compliance matrix

RFP requirement	Our response
Laptop configuration (14-inch, Core i5 class, 16 GB, 512 GB, Windows 11 Pro)	Meets the requirement.

RFP requirement	Our response
Delivery of the full order in 8 weeks	Delivery in 3 weeks.
Company image, tagging, setup and enrolment	Imaging and asset tags are included in the price.
Encryption, TPM 2.0 and secure wiping	Built-in protection is provided.
BIS registration and energy rating	Our products are secure and certified.
Warranty of 3 years with repair times	Warranty is provided with the laptop.
Budget guideline of about Rs 60 lakh	Our price of Rs 48,97,000 is within budget.
Price table, timeline, team, risks, support, references	Included in this response.

3. Implementation Approach, Timeline, Team and Milestones

3.1 Implementation approach

Our plan is short and practical. After we receive the purchase order, we prepare the laptops from our stock, install the software image that Meridian gives us, attach the asset tags and send the laptops to Meridian by courier. When the laptops arrive, our technician is available to help Meridian's team with any questions about setting up.

Because we keep stock in our own warehouse, we do not have to wait for supplies from factories, and this is why we can deliver faster than most suppliers. Our technicians have prepared many laptops in this way, and they know how to work quickly without making mistakes.

We like to keep the process light. Our technicians work in a clean preparation area where each laptop is unpacked, started, updated and then packed again in its own box. The boxes are stacked and labelled so that Meridian can see at a glance which laptops have been prepared and which are still to come. Customers have told us that this tidy approach makes their own unpacking easy.

When the work is complete, we ask Meridian to check the laptops and tell us if anything needs attention. We want customers to be happy with the result, and we will always try to put right any problem as soon as we hear about it.

3.2 Timeline and milestone table

Milestone	Week	Deliverable
Order and preparation	1	Laptops prepared with software image and asset tags
Delivery	3	Laptops delivered to Meridian

3.3 Team structure

BrightPath Tech works as a small and friendly team. Our sales, technical and delivery colleagues work together on every order, and the team members who look after Meridian will be assigned when the order is confirmed. Meridian will have one contact person for questions.

3.4 Delivery risks and mitigation

We have delivered orders on time since we began, and we expect the same here. If a problem comes up, we will tell Meridian quickly and find a solution together. Our experience is that open communication solves most difficulties before they become serious.

Stock availability is the most common worry for laptop orders, and our warehouse is the best answer to it. We also keep a good relationship with our courier so that parcels are handled with care.

4. Price Table and Assumptions

4.1 Price table

Item	Quantity	Unit Price (Rs)	Total (Rs)
BrightPath Value 14 laptop	100	41,000	41,00,000
Basic imaging and asset tags	100	500	50,000
Subtotal			**41,50,000**

Item	Quantity	Unit Price (Rs)	Total (Rs)
GST at 18 percent			**7,47,000**
Grand Total			**48,97,000**

The total price of Rs 48,97,000 includes all the items listed above and GST. This is a clear and simple price for a clear and simple product.

4.2 Assumptions and exclusions

- Prices are for delivery to Meridian's office in Hyderabad.
- Meridian supplies the software image for installation.
- Items that are not listed in the price table are not included.

4.3 Payment terms, price validity and optional items

Payment terms are normally agreed when the order is placed. The price is valid while stocks last. An extended warranty is available for customers who want longer cover, and our sales team will be glad to talk about it.

We keep our prices low because we run a lean business, buy in volume and avoid expensive middlemen. We believe that this approach is good for customers, and we have found that it builds long relationships.

5. Security, Compliance and Risk Controls

5.1 Device security controls

BrightPath laptops are secure and come with built-in protection. The laptops include modern security features that help to keep company information safe, and our technicians set them up with care. We know that security matters to Meridian and we take it seriously.

Staff are encouraged to use strong passwords and to keep their software up to date. Good habits by users are as important as the technology in the laptop, and we are happy to share simple tips with Meridian's new employees when they receive their devices.

5.2 Certifications and standards

We supply secure and certified products. Our laptops come from well-known manufacturers who follow industry standards for safety and quality. We choose products that are suitable for sale in India and for use in business.

5.3 Data wiping, privacy and auditability

We respect the privacy of our customers and handle their information with care. Laptops that are returned can be cleaned so that they are ready for the next user. We keep simple records of the laptops we deliver so that we can answer questions later.

Privacy is also a matter of good manners. We do not share our customers' names or orders with others, and we ask our staff to keep what they see on a customer's laptop to themselves. Our office has a locked storage room for the laptops that are waiting to be collected, and only the technical team has the key.

5.4 Risk register

We look at risks in a practical way and deal with them as they appear, because we believe that experienced people with good judgement are the best protection for a project of this size.

6. Support Model, Relevant Experience and References

6.1 Support model

Every BrightPath Value 14 comes with a 1-year carry-in warranty. If a laptop has a problem, Meridian brings it to our service desk or sends it to us, and we repair or replace it. Our helpdesk is available during business hours and our team does its best to respond quickly.

An extended warranty is available for Meridian if longer cover is wanted. Our support team is friendly and knows our products well, and we will look after Meridian's employees as we would look after our own.

When a customer calls, we first try to understand what the user was doing when the problem appeared. Many problems turn out to be simple settings, and we can solve them over the phone in a few minutes. Problems that need a repair are noted down, and the laptop is taken in at our service desk. We keep our service desk tidy and welcoming, and customers are always offered a cup of tea while they wait.

6.2 Relevant experience

BrightPath Tech was founded in 2023. In our first years we have served small businesses and education customers, and we are proud of the relationships we have built. One earlier order was for 20 laptops for a coaching institute, delivered on time and to the customer's satisfaction.

Although we are a young company, our people have many years of experience in the computer trade. We have taken that knowledge into our company, and we are ready to apply it to Meridian's order. We are keen to grow with Meridian and to become a trusted partner for the future.

Our technicians have been trained on the main laptop brands that are sold in India and are used to the questions that business users ask. They know how to move files from an old laptop to a new one, how to set up printers and how to connect a laptop to meeting room screens. These small skills make a large difference to the first week of a new employee.

6.3 References

Client	Laptops supplied	Year	Contact
Coaching institute in Hyderabad	20	2024	Not given

The coaching institute was pleased with the service and has placed repeat orders for accessories.

6.4 About our company

Our name reflects our belief that technology should light the way for people at work. We began in a small shop and have grown into a company with our own warehouse, a team of technicians and a growing list of customers. We celebrate each new customer and treat each order with the same care, whether it is for 5 laptops or for 100.

We believe that good service comes from good people, and so we try to hire people who like to help. Several of our technicians started as customers who were impressed by the way they were treated and asked if we had a vacancy. We are proud that our staff stay with us and that many of them have taken on more responsibility each year.

We invest in training our staff so that they can explain products in plain language. Every new colleague spends the first weeks with the technical team, learning how laptops are prepared and tested, before they speak to customers. This helps us to give clear and honest answers.

We also care about the environment. Our packaging is made mostly of recycled cardboard, and we ask our courier to combine deliveries wherever they can. Old laptops that customers no longer need are collected and passed to responsible recyclers.

7. Declaration and Contact

This offer is valid for 30 days from 7 October 2026.

Authorised signatory: Karan Mehra, Sales Head, BrightPath Tech.
