Horizon Datacom

Response to RFP MA-RFP-2026-017

Meridian Analytics Pvt. Ltd., Hyderabad - supply of 100 business laptops

Submission date: 6 October 2026

Contact: Ishaan Chatterjee, Project Manager | Email: ishaan@horizondatacom.example | Phone: +91 40 5550 6606

1. Executive Summary and Understanding of the Requirement

1.1 Summary of our offer

Horizon Datacom proposes to supply Meridian Analytics Pvt. Ltd. with 100 Horizon H14 Pro laptops. Each laptop has an AMD Ryzen 5 7530U processor, 16 GB of DDR4 memory, a 512 GB NVMe SSD, a 14-inch WUXGA display and Windows 11 Pro. We deliver all 100 units within 5 weeks of the order, in a pilot of 5 units followed by two waves of 55 and 40 units. The all-inclusive price is Rs 59,47,200, which is Rs 52,800 below the Rs 60 lakh guideline.

- Quantity: 100 laptops, each with an asset tag and Meridian's company image.
- Delivery: pilot in Week 2, first wave of 55 units in Week 3, second wave of 40 units in Week 4, closure in Week 5.
- Warranty: 3 years on site with a 24-hour replacement unit.
- Price: Rs 59,47,200 including 18 percent GST, imaging, asset tagging, the pilot, two desk-side setup days and the warranty.

1.2 Our understanding of Meridian's requirement

Meridian wants 100 laptops that work on the first day for people who have just joined. In our reading, the requirement has four parts. The hardware must match the stated specification. The software must arrive ready, meaning the company image, an asset tag, device management enrolment and directory sign-in. The security base must be in place, meaning encryption, TPM 2.0 and a clean wipe of returned devices. The service must last, meaning a warranty of at least 3 years with clear repair times.

Meridian also wants the commercial side to fit a budget of about Rs 60 lakh, and it wants evidence in the form of a price table, a timeline, a team, risk controls, a support model, experience and references. We address each of these in the sections that follow.

We also note the human side of the requirement. A new employee who receives a laptop that is already enrolled, tagged and signed in avoids a half-day of waiting on the first morning. Multiplied by 100 employees, that saved time is a real return on the programme, and it is the reason we put so much work into the lab stage.

1.3 Why choose us

Horizon Datacom has delivered laptop programmes for corporate customers since 2015, and we run each programme as a short project with a start, a proof run, two waves and a closure. Our project manager, Ishaan Chatterjee, is named in this proposal and leads Meridian's project from the first meeting to the closure certificate.

Our promise on service is concrete. If a laptop fails, a replacement unit reaches the desk within 24 hours, and the failed unit is repaired at our centre. Our references can confirm that we keep this promise.

Meridian's project manager is a person, not a mailbox. Ishaan Chatterjee answers his telephone during working hours, and when he is away, his deputy has the same project file and the same authority to approve changes.

Behind that promise sit numbers from our last 14 programmes. Twelve of them closed on or before the date agreed at Stage A, and the other two closed within 3 days of it. First-year hardware failure across those fleets averaged 1.2 percent of units, and every failure was answered with a replacement inside the 24-hour window.

2. Proposed Solution (Laptop Model and Specifications)

2.1 Laptop model and specification table

Component	Horizon H14 Pro specification
Processor	AMD Ryzen 5 7530U, 6 cores and 12 threads, up to 4.5 GHz boost, 16 MB cache
Memory	16 GB DDR4-3200 (2 x 8 GB SO-DIMM), upgradeable to 32 GB
Storage	512 GB NVMe PCIe Gen3 SSD
Display	14.0-inch WUXGA 1920 x 1200 IPS, 16:10, 350 nits, anti-glare
Battery	57 Wh; 10 hours claimed and 9 hours measured in mixed office use
Weight	1.38 kg
Ports	1 x USB-C 3.2 Gen 2 (DisplayPort 1.4 and Power Delivery), 1 x USB-C 3.2 Gen 1, 2 x USB-A 3.2 Gen 1, 1 x HDMI 2.0, 1 x RJ-45 Gigabit Ethernet, 1 x 3.5 mm audio
Wireless	Wi-Fi 6E (802.11ax) and Bluetooth 5.3
Operating system	Windows 11 Pro, 64-bit
Security hardware	Discrete TPM 2.0, fingerprint reader integrated in the power button, camera shutter, Kensington lock slot

2.2 Performance, battery life and build quality

The Ryzen 5 7530U runs six cores with simultaneous multithreading, and this suits the mix of browser tabs, spreadsheets, video meetings and security agents that a new employee opens in the first week. The NVMe drive reads sequentially at up to 3,500 MB per second, so Windows 11 Pro starts in under 18 seconds.

Thermal behaviour is stable under load. One fan and a copper heat pipe hold the processor at its 15 W sustained setting, the fan stays below 34 dBA in normal use, and the palm rest stays under 40 degrees Celsius. The keyboard has a 2-level backlight, the 1080p camera supports face sign-in and the two-microphone array filters background noise during calls.

The 57 Wh battery is rated by the manufacturer for 10 hours. Our own test used a mixed office script of document editing, web browsing and a 30-minute video call per cycle at 150 nits on Wi-Fi, and the laptop lasted 9 hours. Meridian can plan on 9 hours per charge, which clears the 8-hour requirement.

The lid is made of aluminium and the base of glass-fibre reinforced plastic, which keeps the laptop to 1.38 kg without losing rigidity. The 16:10 display shows about 11 percent more vertical content than a 16:9 panel, and the keyboard has 1.5 mm travel with a drainage channel for small spills. The bottom cover opens with 7 screws, so memory and SSD are replaced on site in under 15 minutes.

Wireless performance is a second area of care. The Wi-Fi 6E adapter supports the 6 GHz band where Meridian's access points offer it, and falls back to 5 GHz and 2.4 GHz automatically. The Gigabit Ethernet port lets desk-bound staff use a wired connection for large file transfers, and the USB-C port with DisplayPort drives a second monitor from a single cable.

2.3 Fit with Meridian's environment

Horizon enrols every laptop in Meridian's device management platform and joins it to directory sign-in in our lab. Meridian provides the enrolment token and directory settings during Stage B of the plan, and a test account from Meridian's directory signs in on each pilot unit before the first wave is released. The company image contains Meridian's policies, certificates, VPN profile and standard applications.

Every laptop ships with a 65 W USB-C charger, a sleeve and a one-page start guide that lists the helpdesk number. Meridian can order further H14 Pro laptops at Rs 45,200 per unit for 12 months from the date of this proposal, with delivery 3 weeks after each order, and the same image applies to the new units.

Consistency is a design goal. All 100 units leave our lab with the same BIOS version, the same drivers and the same image build number, and these identifiers are printed in the asset register next to each serial number. When Meridian updates its image later, our build engineer tests the update file on 2 laptops in our lab and hands it over with a short change note.

2.4 Compliance matrix

RFP requirement	Our response
Hardware: 14-inch, Core i5 or Ryzen 5 class or better, 16 GB RAM, 512 GB SSD, 8-hour battery, Windows 11 Pro	Meets all points. Horizon H14 Pro with Ryzen 5 7530U, 16 GB DDR4, 512 GB NVMe, 14.0-inch WUXGA, 9 hours measured battery and Windows 11 Pro.
Delivery of every unit inside 8 weeks	Meets the requirement. We deliver in 5 weeks: pilot of 5 units in Week 2, first wave of 55 units in Week 3, second wave of 40 units in Week 4.
Company image, tags, setup support, device management and directory sign-in	Meets all points. Image locked in Week 1, tags and enrolment completed in our lab, two desk-side setup days in Weeks 4 and 5.
Disk encryption, TPM 2.0, secure wiping	Meets all points. Encryption is pre-enabled; discrete TPM 2.0; wiping is confirmed in writing for each device.
BIS registration and an energy rating	Meets the requirement. BIS registered and ENERGY STAR certified.
At least 3 years of warranty with repair times	Meets the requirement. 3-year on-site warranty with a 24-hour replacement unit.
Budget guideline of about Rs 60 lakh including taxes and services	Within budget. Total Rs 59,47,200 including GST.
Evidence pack: price table, assumptions, timeline, team, risks, support, experience, references	Supplied in Sections 3 to 6, with a 4-person team and 3 named references.

3. Implementation Approach, Timeline, Team and Milestones

3.1 Implementation approach

We run the project in seven stages. Stage A, Alignment, takes place in Week 0: Ishaan Chatterjee meets Meridian's IT lead, confirms the plan, collects delivery addresses and names the people who will receive laptops. Stage B, Image Lock, takes place in Week 1: Meridian shares the reference image, enrolment token and naming scheme, and our build engineer, Revathi Gopal, prepares the master image, which Meridian approves in writing.

Stage C, Proof Run, takes place in Week 2. We deliver 5 finished laptops, and Meridian's team tests them for 3 working days against a written checklist covering sign-in, policies, VPN, printing, battery status and encryption status. Defects found in the proof run are fixed within 2 working days, and the master image is re-issued if needed.

The proof run exists to protect the two waves. A defect that would reach 55 users is cheaper to remove on 5 laptops, and we treat the proof run as a gate: the first wave is released only after Meridian signs the proof-run checklist.

Stage D, First Wave, delivers 55 laptops in Week 3. Stage E, Second Wave, delivers the last 40 laptops in Week 4. With the 5 proof-run units, this makes 100. Dispatch controller Tariq Hussain sends a serial-number list and an asset-tag list on the day each wave leaves our depot. Stage F, Desk-side Setup, runs on two days across Weeks 4 and 5: our engineers sit with users, complete first sign-in and note any adjustments. Stage G, Closure, takes place in Week 5, when Meridian receives the asset register, the recovery key register and the closure certificate for signature.

Our spare pool supports the plan. We keep 4 replacement laptops per 100 units delivered in the Hyderabad depot, and the pool is refilled on the day a spare leaves. A spare is already imaged with Meridian's build when it is shipped, so the exchange at the user's desk takes about 20 minutes.

Each laptop passes a 20-point functional test and a 4-hour burn-in before packing. Laptops that fail are rebuilt, and their test sheets are kept with the serial number. The status report goes out every Thursday and gives units built, units shipped, units delivered, open points and the plan for the following week.

3.2 Timeline and milestone table

Milestone	Week	Deliverable
Stage A: Alignment	0	Plan, contact list and delivery addresses agreed
Stage B: Image Lock	1	Master image and enrolment token approved by Meridian
Stage C: Proof Run	2	Pilot of 5 laptops delivered with test checklist
Stage D: First Wave	3	55 laptops delivered with serial list

Milestone	Week	Deliverable
Stage E: Second Wave	4	40 laptops delivered; asset register issued
Stage F: Desk-side Setup	4 to 5	Two on-site setup days; first sign-in completed
Stage G: Closure	5	Signed closure certificate and recovery key register

3.3 Team structure

Role	Name	Responsibility
Project Manager	Ishaan Chatterjee	Owns the plan, weekly report and Meridian's day-to-day contact
Build Engineer	Revathi Gopal	Master image, device management enrolment, proof-run fixes
Dispatch Controller	Tariq Hussain	Wave dispatch, courier tracking, asset register
Service Desk Lead	Nandini Bose	Desk-side setup days, warranty desk and replacement-unit stock

3.4 Delivery risks and mitigation

- Proof run reveals an image defect: the 3-day test is followed by a 2-day fix window, and the corrected image is checked on 2 laptops before the first wave.
- A courier misses a wave: two courier firms are booked, and each wave leaves 2 days before its due date.
- Enrolment token arrives late: the token deadline is the end of Week 1, and the project manager sends a reminder on Day 3.
- Component shortage: parts for all 100 laptops are reserved when the order is signed.
- Transit damage: every laptop travels double-boxed, and 4 spare laptops wait in our Hyderabad depot for same-day exchange.

4. Price Table and Assumptions

4.1 Price table

Item	Quantity	Unit Price (Rs)	Total (Rs)
Horizon H14 Pro laptop (16 GB, 512 GB SSD, Windows 11 Pro)	100	45,200	45,20,000
Imaging, asset tagging and 5-unit pilot	100	1,400	1,40,000
On-site setup days (2 days, lump sum)	1	80,000	80,000
3-year on-site warranty with 24-hour replacement unit	100	3,000	3,00,000
Subtotal			**50,40,000**
GST at 18 percent			**9,07,200**
Grand Total			**59,47,200**

4.2 Assumptions and exclusions

- Every price is stated in rupees and assumes one receiving point in Hyderabad.
- Meridian supplies the reference image, enrolment token and directory settings by the end of Week 1.
- Setup covers two on-site days; each additional day costs Rs 28,000 plus GST.
- Warranty cover does not extend to spilled liquids, deliberate misuse or lost devices.
- Licences other than Windows 11 Pro are supplied by Meridian.

4.3 Payment terms, price validity and optional items

Payment is made in three parts: 30 percent with the purchase order, 50 percent when the second wave is delivered in Week 4, and 20 percent when Meridian signs the closure certificate. Invoices are payable within 15 days. The price of Rs 59,47,200 is valid for 45 days from 6 October 2026. Optional items outside the total are a 32 GB memory upgrade at Rs 4,200 per laptop and a docking station at Rs 7,500 per unit, each plus GST.

Each invoice shows the purchase order number, the GST registration number and the serial-number range it covers. The unit prices are fixed for the whole order, and Horizon bears any component cost increase that occurs before the second wave is delivered.

5. Security, Compliance and Risk Controls

5.1 Device security controls

- Drive encryption is pre-enabled in our lab before dispatch.
- Recovery keys are listed in a register that is handed to Meridian's administrators at closure.
- The discrete TPM 2.0 chip protects the keys.
- Secure boot is on, USB boot is off and each unit has its own BIOS password.
- Users work with standard accounts; administrator rights stay with Meridian's IT team.

Meridian's security baseline is part of the master image, including firewall settings, application control rules and update rings. Firmware for the BIOS, TPM and USB-C controller is brought to the latest release at the build stage, and the versions are listed in the asset register so that Meridian's security team can verify them.

5.2 Certifications and standards

The Horizon H14 Pro is BIS registered and ENERGY STAR certified. Copies of both certificates travel with the delivery documents of the first wave.

The packaging and adapter comply with India's e-waste rules, and the manufacturer's take-back scheme accepts the laptops when they reach end of life. Certificate numbers are filed in the project folder under the model number.

5.3 Data wiping, privacy and auditability

Returned devices are wiped with a full-disk cryptographic erase and a verification read, and Meridian receives a written confirmation with serial number, date and operator for every wiped device. A log with one line per serial number records dispatch, delivery, exchange and return, and it is kept for the 3 years of the warranty.

Meridian's auditors can read the log within 3 working days of a request. Engineers who visit Meridian's office wear identity cards, register at reception and work only on devices that have been enrolled, and they carry no user data away from the site.

5.4 Risk register

Risk	Impact	Control
Stolen or lost laptop	Data exposure	Encrypted drive with TPM protection; remote lock through device management
Returned device not wiped	Residual data	Redeployment is blocked until the wipe confirmation is filed
Loss of the recovery key register	Delayed recovery	Register is given to two named administrators in print and as a sealed file
Changed BIOS settings	Weak boot protection	Per-unit BIOS password; secure boot enforced
Engineer sees user data	Privacy breach	Confidentiality undertaking signed by each engineer; work only on enrolled devices

6. Support Model, Relevant Experience and References

6.1 Support model

- Warranty: 3 years on site, parts and labour included.
- Replacement: a pre-imaged replacement unit reaches the user's desk within 24 hours of a fault report; the faulty unit is repaired at our centre.
- Service desk: open from 8 am to 7 pm, Monday to Saturday, by telephone, email and web portal.
- Response: 1 hour for a laptop that does not start, 4 hours for other faults, and the next business day for software questions.
- Escalation level 1: service desk engineer, who owns the ticket for 2 hours.
- Escalation level 2: Nandini Bose, the Service Desk Lead, who takes over after 2 hours and reports to Meridian by 8 hours.
- Escalation level 3: Ishaan Chatterjee, who steps in after 24 hours or on Meridian's request.

Quarterly reviews take place during the warranty, and the Service Desk Lead brings the ticket count, the average fix time and the battery health of a sample of 10 laptops to each review.

6.2 Relevant experience

Horizon Datacom has supplied corporate laptops since 2015. In that time we completed 14 programmes of 100 or more laptops, with 1,640 laptops in total. The largest was a 230-laptop programme for an engineering services company in 2025.

Our programmes are concentrated in sectors where the same people who buy laptops also answer to auditors. Media, health analytics, engineering and financial services account for 11 of the 14 programmes, and each one finished with a signed closure certificate, a recovery key register and an asset register in a form the client's auditors accepted.

Client	Laptops	Year	Outcome
Fernhill Engineering	230	2025	Delivered in 5 weeks in two waves; closure certificate signed on schedule
Cobaltine Media	140	2024	Pilot of 5 units and two waves; 0 sign-in failures at first login
Tamarind Health Analytics	110	2023	Delivered in 4 weeks; 1 replacement unit used in year one

6.3 References

Reference	Contact	Laptops supplied	Year
Fernhill Engineering	Rohit Saxena, Head of IT	230	2025
Cobaltine Media	Lakshmi Prabhu, Systems Manager	140	2024
Tamarind Health Analytics	Yusuf Qureshi, Infrastructure Manager	110	2023

7. Declaration and Contact

Horizon Datacom holds the terms of this offer open for 45 days after 6 October 2026.

Authorised signatory: Ishaan Chatterjee, Project Manager, Horizon Datacom.
