NexaWorks

Response to RFP MA-RFP-2026-017

Meridian Analytics Pvt. Ltd., Hyderabad - supply of 100 business laptops

Submission date: 6 October 2026

Contact: Naveen Bhargav, Account and Project Manager | Email: naveen@nexaworks.example | Phone: +91 40 5550 3303

1. Executive Summary and Understanding of the Requirement

1.1 Summary of our offer

NexaWorks offers Meridian Analytics Pvt. Ltd. 100 NexaBook Pro 14 laptops, each with an Intel Core i5-1335U processor, 16 GB of memory, a 512 GB NVMe SSD, a 14-inch Full HD display and Windows 11 Pro. All 100 units are delivered in 5 weeks from the purchase order. The total price is Rs 59,35,400 including 18 percent GST, which is Rs 64,600 below the Rs 60 lakh guideline.

The price covers the laptops, company image installation, asset tagging, a pilot of 5 units, three on-site setup days and a 3-year on-site warranty with a 24-hour replacement unit. Nothing else is needed to bring the 100 laptops into daily use.

The pilot of 5 units takes place in Week 2, Bulk deliveries of 60 and 40 units follow in Weeks 3 and 4, and the signed handover takes place in Week 5. Meridian receives a fixed price: the unit prices in Section 4.1 do not change if the delivery is completed inside the 8-week window that the RFP allows.

1.2 Our understanding of Meridian's requirement

Meridian is hiring and must put 100 productive laptops on 100 desks without disturbing the work of its IT team. To do that, the laptops must match the stated configuration, arrive with the company image and an asset tag, appear in Meridian's device management console and accept directory sign-in on the first attempt. Every unit must be encrypted, carry TPM 2.0 and be wiped before reuse.

We also understand that Meridian wants proof, not promises: BIS and energy certifications, a warranty of at least 3 years with stated repair times, a timeline with checkpoints, a named team and references that Meridian can call. This response gives all of them.

Finally, we understand that the order is a rollout and not only a purchase. New employees start on fixed dates, so late laptops cost Meridian salary days. For that reason our plan finishes in 5 weeks and leaves a buffer of 3 weeks against the 8-week limit. If Meridian's start dates move, the Week 3 and Week 4 deliveries move with them, and the spare units stay in our depot.

1.3 Why choose us

NexaWorks has delivered end-to-end laptop rollouts since 2016, and implementation is what we do best. The plan in Section 3 has a pilot in Week 2, two bulk deliveries in Weeks 3 and 4, three on-site setup days and a signed handover in Week 5. Every phase has a named owner and a written exit test.

Our support promise is equally concrete: a replacement laptop on the user's desk within 24 hours of a fault report, a helpdesk open from 8 am to 8 pm Monday to Saturday, and three clearly timed escalation levels. Meridian's new employees keep working while the faulty unit is repaired in our workshop.

Our delivery record backs these promises. Across our last 11 corporate projects, 10 finished on or before the committed handover date, and the eleventh finished 2 days late because of a customer-side network change. Average first-year failure across those fleets was 1.1 percent of units, and every faulty unit was replaced within the 24-hour window.

2. Proposed Solution (Laptop Model and Specifications)

2.1 Laptop model and specification table

Component	NexaBook Pro 14 specification
Processor	Intel Core i5-1335U, 10 cores, up to 4.6 GHz turbo, 12 MB cache
Memory	16 GB DDR5-4800 (2 x 8 GB), 2 slots, upgradeable to 32 GB
Storage	512 GB NVMe PCIe Gen4 SSD
Display	14.0-inch Full HD 1920 x 1080 IPS, 300 nits, anti-glare
Battery	56 Wh; 10 hours claimed and 9 hours measured in mixed office use
Weight	1.40 kg
Ports	2 x USB-C 3.2 Gen 2 (one with DisplayPort 1.4 and Power Delivery), 2 x USB-A 3.2 Gen 1, 1 x HDMI 1.4b, 1 x 3.5 mm audio
Wireless	Wi-Fi 6 (802.11ax) and Bluetooth 5.2
Operating system	Windows 11 Pro, 64-bit
Security hardware	Discrete TPM 2.0, fingerprint reader, camera privacy shutter, Kensington lock slot

2.2 Performance, battery life and build quality

The Core i5-1335U gives the NexaBook Pro 14 enough power for Microsoft 365, browser-based business applications, video meetings and the endpoint security agent running together. Memory in dual-channel DDR5 keeps multitasking smooth, and the NVMe Gen4 drive cold-boots Windows 11 in under 15 seconds.

The 56 Wh battery lasts 10 hours by the manufacturer's claim. Our own measurement in mixed office use, which combined document editing, web browsing and two video calls at 150 nits brightness on Wi-Fi, gave 9 hours. We quote the 9-hour figure for planning, and it exceeds Meridian's 8-hour requirement.

The chassis combines an aluminium lid with a reinforced polycarbonate base. The keyboard has 1.5 mm travel and a spill drain, the hinge is tested for 25,000 open and close cycles, and the 1.40 kg weight makes the laptop easy to carry between desk and meeting room. The bottom cover is held by 6 screws, so memory and SSD replacement on site takes under 15 minutes.

Thermal and acoustic behaviour suit an open office. A single fan and a copper heat pipe keep the processor at its rated 15 W sustained limit, and the fan stays under 33 dBA during normal work. The keyboard backlight has two levels, the 720p camera supports Windows Hello face sign-in alongside the fingerprint reader, and the dual-array microphone cancels background noise on calls. The charger reaches 50 percent in 35 minutes.

Battery health is tracked at handover. We record the design capacity and the full-charge capacity of every battery, and the sheet shows at least 98 percent of design capacity for each unit delivered.

2.3 Fit with Meridian's environment

Every laptop is enrolled in Meridian's device management platform and joined to directory sign-in during the pilot and bulk build, using the enrolment token Meridian gives us at image sign-off in Week 1. A test user from Meridian's directory signs in on every pilot unit before we release bulk production. Group policies, certificates, VPN profiles and the standard application set are included in the company image.

Accessories shipped with each unit are a 65 W USB-C charger, a protective sleeve and a printed first-day guide. Meridian can order additional laptops of the same model at the unit price of Rs 45,000 for 12 months from the date of this proposal, with delivery within 3 weeks of each order, so new joiners always receive the same machine.

The same image works on every unit, which keeps support simple. Each NexaBook Pro 14 is built with identical firmware, BIOS settings and driver versions, and the build sheet for every serial number is part of the asset register. If Meridian updates its image later, our imaging engineer prepares the update file and tests it on 2 laptops in our lab before Meridian pushes it to the fleet.

Spare laptops equal to 4 percent of the fleet are stored at our Hyderabad depot for the warranty period. These spares make the 24-hour replacement promise possible, and each one carries Meridian's current image.

2.4 Compliance matrix

RFP requirement	Our response
Configuration: 14-inch, Core i5 or Ryzen 5 class, 16 GB, 512 GB SSD, over 8 hours battery, Windows 11 Pro	Complies. NexaBook Pro 14 with Core i5-1335U, 16 GB DDR5, 512 GB NVMe, 14.0-inch Full HD, 9 hours measured battery, Windows 11 Pro.
All 100 units within 8 weeks	Complies. All units are delivered in 5 weeks: 5-unit pilot in Week 2, 60 units in Week 3, 40 units in Week 4.
Image, asset tags, setup and enrolment	Complies. Image sign-off in Week 1; tagging and enrolment in our lab; three on-site setup days in Weeks 4 to 5.
Encryption, TPM 2.0 and wiping	Complies. Encryption is enabled before dispatch; discrete TPM 2.0; each wiped device receives a written confirmation.
BIS registration and energy rating	Complies. BIS registered; ENERGY STAR certified.
Warranty of 3 years or more with repair times	Complies. 3-year on-site warranty; 24-hour replacement unit; helpdesk 8 am to 8 pm, Monday to Saturday.
Budget of about Rs 60 lakh	Complies. Total Rs 59,35,400 including GST and services.
Price table, assumptions, timeline, team, risks, support, experience, references	Complies. Provided in Sections 3 to 6 with a 4-person team and 3 named references.

3. Implementation Approach, Timeline, Team and Milestones

3.1 Implementation approach

Phase 1, kickoff in Week 0: the project manager, Naveen Bhargav, holds a 90-minute kickoff with Meridian's IT lead, confirms the plan, shipping address and floor layout, and issues the project contact sheet. Phase 2, image sign-off in Week 1: Meridian supplies the reference image and enrolment token, our imaging engineer builds the golden image and Meridian signs it off in writing by Friday of Week 1.

Phase 3, pilot in Week 2: 5 laptops are imaged, tagged, encrypted and delivered. Meridian's IT staff test them for 3 working days against a 25-point checklist covering sign-in, policies, VPN, printing, battery and encryption status. Pilot findings are fixed within 2 working days and the corrected image is released.

Phase 4, bulk delivery in Weeks 3 and 4: Meridian receives 60 units in total by the end of Week 3, made up of the 5 pilot units and 55 further laptops, and the remaining 40 units in Week 4. Each laptop carries an asset tag, and a serial-number list is e-mailed on the day of dispatch. Phase 5, on-site setup in Weeks 4 and 5: three setup days are held at Meridian's office, during which our engineers hand laptops to users, assist first sign-in and collect feedback.

Quality checks are fixed. Every laptop goes through a 20-point functional test, a 4-hour burn-in and a battery charge-discharge check before it is packed, and failed units are rebuilt and retested. The test result for each serial number is part of the delivery pack, so Meridian's team knows exactly what was checked before the laptop left our lab.

Phase 6, handover in Week 5: we deliver the final asset register, the recovery key register, the warranty guide and the escalation sheet, and Meridian signs the handover certificate. The support team then takes over from the project team.

Reporting is weekly. Every Friday from Week 0 to Week 5, the project manager sends Meridian a one-page status report that lists units imaged, units dispatched, units delivered, open issues and the plan for the next week. Meridian's IT lead and the project manager hold a 30-minute call on Thursdays to review the report and agree actions.

3.2 Timeline and milestone table

Milestone	Week	Deliverable
Kickoff	0	Project plan, contact sheet and shipping addresses confirmed
Image sign-off	1	Meridian's image and enrolment token accepted in writing
Pilot of 5 units	2	5 laptops delivered; 25-point test checklist issued
Bulk delivery of 60 units	3	60 units delivered in total, including the 5 pilot units
Bulk delivery of 40 units	4	Remaining 40 units delivered; asset register issued

Milestone	Week	Deliverable
Three on-site setup days	4 to 5	Laptops handed to users; first sign-in support
Handover and sign-off	5	Signed handover certificate, recovery key register, warranty guide

3.3 Team structure

Role	Name	Responsibility
Project Manager	Naveen Bhargav	Plan, weekly status report, Meridian's single point of contact
Imaging Engineer	Latha Subramanian	Golden image, device management enrolment and pilot fixes
Logistics Lead	Faisal Ahmed	Batch dispatch, courier tracking and the asset register
Support Lead	Dhanya Krishnan	Setup days, helpdesk handover and replacement-unit stock

3.4 Delivery risks and mitigation

Risk	Likelihood	Mitigation
Pilot finds an image error	Medium	3-day pilot test with a 2-day fix window; corrected image re-tested on 2 laptops before release
Courier delay on Week 3 or 4 batch	Low	Two courier partners; dispatch 2 days before the due date
Late enrolment token	Medium	Token due by end of Week 1; reminder on Day 3; fallback manual enrolment script
Component shortage	Low	Stock for all 100 laptops is reserved at order signing
Transit damage	Low	Double-box packing and 4 spare laptops in Hyderabad for swap

4. Price Table and Assumptions

4.1 Price table

Item	Quantity	Unit Price (Rs)	Total (Rs)
NexaBook Pro 14 laptop (16 GB, 512 GB SSD, Windows 11 Pro)	100	45,000	45,00,000
Imaging, asset tagging and 5-unit pilot	100	1,400	1,40,000
On-site setup days (3 days, lump sum)	1	90,000	90,000
3-year on-site warranty with 24-hour replacement unit	100	3,000	3,00,000
Subtotal			**50,30,000**
GST at 18 percent			**9,05,400**
Grand Total			**59,35,400**

4.2 Assumptions and exclusions

- Prices are in Indian rupees and cover delivery to one address in Hyderabad.
- Meridian provides the reference image, enrolment token and directory details by the end of Week 1.
- The setup service covers three on-site days; further days cost Rs 30,000 per day plus GST.
- The warranty excludes liquid damage, physical misuse and loss.
- Software licences other than Windows 11 Pro are supplied by Meridian.

4.3 Payment terms, price validity and optional items

Payment terms are 40 percent with the purchase order, 40 percent on completion of the Week 4 delivery and 20 percent on signature of the handover certificate. The price is valid for 45 days from 6 October 2026. Optional items, which are not in the total of Rs 59,35,400, are a 32 GB memory upgrade at Rs 4,500 per laptop and a docking station at Rs 7,800 per unit, each plus GST.

Invoices are issued in three parts that match the payment terms, each showing the purchase order number, the GST registration number and the serial-number range covered. Payment is due within 15 days of the invoice date. The unit prices are firm for the whole order, and NexaWorks carries any component price change that happens before delivery.

5. Security, Compliance and Risk Controls

5.1 Device security controls

BitLocker drive encryption is pre-enabled before dispatch, and the recovery keys are delivered to Meridian's administrators in a key register at handover. The discrete TPM 2.0 chip holds the keys. Secure boot is enabled, USB boot is disabled and a BIOS password is set on each unit. Users receive standard accounts without administrator rights.

Windows security baselines supplied by Meridian are applied in the image, including firewall profiles, application control rules and update rings. Firmware for the BIOS, the TPM and the Thunderbolt-capable USB-C controller is updated to the latest release at imaging time, and the versions installed are recorded in the asset register so that Meridian's security team can verify them.

5.2 Certifications and standards

The NexaBook Pro 14 is BIS registered under IS 13252 and carries ENERGY STAR certification. Both certificates are supplied with the delivery documents.

The packaging, power adapter and battery of the NexaBook Pro 14 are compliant with the e-waste rules that apply in India, and the manufacturer's recycling programme accepts the laptops at the end of their life. Certificate copies are filed in the project folder under the model number so that Meridian's compliance team can retrieve them at any time.

5.3 Data wiping, privacy and auditability

Returned laptops are wiped with a cryptographic erase followed by a verification pass, and each wiped device receives a written confirmation showing serial number, date and operator. We keep a record of every laptop's release, delivery and return for the 3-year warranty period.

The record is a log with one line per event and per serial number: lab release, courier handover, delivery signature, warranty exchange and return. Meridian's auditors receive the log on request within 3 working days. Engineers who visit Meridian's office carry identity cards and register at the reception, and they handle no user data beyond what is needed for the fix.

5.4 Risk register

Risk	Impact	Control
Lost laptop	Data exposure	Full-disk encryption and TPM protection; remote lock via device management
Unwiped returned device	Data remains	No redeployment before the wipe confirmation is filed
Key register misplaced	Recovery delayed	Register delivered as a signed copy and a sealed digital file to two administrators
Unauthorised BIOS change	Weakened boot security	Per-unit BIOS password and secure boot enforced
Confidential data seen by engineers	Privacy breach	Engineers sign a confidentiality undertaking and work only on enrolled devices

6. Support Model, Relevant Experience and References

6.1 Support model

The warranty is 3 years on site, and a faulty laptop is exchanged for a pre-imaged replacement unit within 24 hours of the fault report, while the original is repaired in our workshop. The helpdesk is open from 8 am to 8 pm, Monday to Saturday, by telephone, email and web portal.

Priority 1 faults, where a laptop does not start or the user cannot work, receive a response within 1 hour and a replacement within 24 hours. Priority 2 faults, such as a failing battery or a damaged keyboard, receive a response within 4 hours and a fix within 2 business days. Priority 3 requests, such as software questions, are answered by the next business day.

Spare stock is part of the promise. The depot in Hyderabad holds 4 replacement laptops for every 100 delivered, and the stock is topped up the day a unit is used. A replacement laptop leaves the depot already imaged with Meridian's current image and carries the same asset-tag series, so the swap takes less than 20 minutes at the user's desk.

Escalation has three levels. Level 1 is the helpdesk engineer, who owns the ticket for the first 2 hours. Level 2 is the support lead, Dhanya Krishnan, who takes over after 2 hours and reports to Meridian by 8 hours. Level 3 is the account manager, Naveen Bhargav, who steps in after 24 hours or at Meridian's request.

6.2 Relevant experience

NexaWorks has supplied managed laptop fleets since 2016, with 1,420 laptops delivered across 11 corporate projects. Our most recent comparable project, for a 120-person logistics software company, delivered 120 laptops in 5 weeks with a pilot and three on-site setup days.

Our experience is concentrated in business laptop rollouts of 100 to 250 units. The 11 projects covered clients in pharma services, software, retail and financial services, and 6 of them included device management enrolment and directory sign-in. Each project ended with a signed handover certificate, and the average time from purchase order to handover was 5.3 weeks.

Each of the three references in the table below received the same plan structure as Meridian: a kickoff, an image sign-off, a pilot, two bulk deliveries, on-site setup days and a signed handover. Meridian is welcome to call any of them, and each contact has agreed to speak about delivery quality, replacement-unit speed and the clarity of our reporting.

6.3 References

Client	Laptops supplied	Year	Contact
Tessellate Software	120	2026	Vidya Narayanan, Head of IT
Ridgeline Pharma Services	200	2025	Omkar Deshpande, IT Manager
Marlowe Retail Group	150	2024	Sheetal Bansal, Infrastructure Lead

7. Declaration and Contact

This offer is valid for 45 days from 6 October 2026.

Authorised signatory: Naveen Bhargav, Account and Project Manager, NexaWorks.
