Orbit Digital

Response to RFP MA-RFP-2026-017

Meridian Analytics Pvt. Ltd., Hyderabad - supply of 100 business laptops

Submission date: 8 October 2026

Contact: Meghna Iyer, Business Development Director | Email: meghna@orbitdigital.example | Phone: +91 40 5550 4404

1. Executive Summary and Understanding of the Requirement

1.1 Summary of our offer

Orbit Digital offers Meridian Analytics Pvt. Ltd. 100 OrbitBook 14 Business laptops with Intel Core i5 processors, 16 GB of memory, a 512 GB SSD and Windows 11 Pro. Delivery is within 7 weeks of the order. The total price is Rs 57,34,800 including GST, delivery and logistics, imaging and a 3-year warranty.

Orbit Digital has been in business for 10 years and has supplied over 3,500 business laptops to companies across India. Our strength is delivering laptops to organisations like Meridian, and the experience tables in Section 6 show what we have done for others.

1.2 Our understanding of Meridian's requirement

Meridian is looking for 100 business laptops for its new joiners. The laptops must be 14-inch models with a Core i5 or Ryzen 5 class processor, 16 GB of memory, a 512 GB SSD, a battery that works through a normal day, and Windows 11 Pro. Meridian also wants the company image installed, asset tags fitted, enrolment into its device management and directory sign-in, security features such as encryption and TPM 2.0, certification, a 3-year warranty and a price close to Rs 60 lakh.

We understand that a good response also has to show that the supplier has done this kind of work before. We have, many times, and we have structured this proposal so that our record is easy to see.

1.3 Why choose us

Experience is the main reason to choose Orbit Digital. Over 10 years we have supplied more than 3,500 business laptops, and our largest single order was 500 laptops for a financial services client in 2023. Eight case studies and four references in Section 6 give the clients, unit counts, years and outcomes.

In practical terms, Meridian benefits from 10 years of lessons. We know which laptop models hold up and which do not, we know how to schedule couriers across Indian cities and we know how to run a handover so that users are productive on day one. That learning is built into every order we ship.

Our price of Rs 44,000 per laptop is competitive for a business-grade machine, and the 3-year warranty is included in the total. Customers return to us: 71 percent of our orders in the last three years came from clients who had bought from us before.

Orbit Digital was founded in 2016 in Hyderabad and has grown to 85 employees, a 1,800 square metre warehouse and service workshop, and offices in Bengaluru and Pune. We hold authorised-partner status with two laptop manufacturers, which lets us buy at manufacturer prices and obtain warranty parts directly. Our on-time delivery rate across the last 40 projects is 95 percent.

2. Proposed Solution (Laptop Model and Specifications)

2.1 Laptop model and specification table

Component	OrbitBook 14 Business specification
Processor	Intel Core i5-1335U
Memory	16 GB DDR4, 3200 MHz
Storage	512 GB NVMe SSD
Display	14.0-inch Full HD IPS
Battery	9 hours

Component	OrbitBook 14 Business specification
Weight	About 1.45 kg
Ports	USB-C, USB-A 3.0, HDMI and audio jack
Wireless	Wi-Fi 6 and Bluetooth 5.1
Operating system	Windows 11 Pro
Security hardware	TPM 2.0 and fingerprint reader

2.2 Performance, battery life and build quality

The OrbitBook 14 Business is a business laptop built for daily office use. The Core i5 processor and 16 GB of memory handle office applications, browsers and video meetings. The NVMe drive gives quick start-up and fast file access.

Battery life is 9 hours in normal office use, which meets the requirement of Meridian. The chassis is made from a mix of aluminium and strong plastic and has been used by our clients in offices, branches and field locations.

Actual battery life depends on the way the laptop is used, and most office users will see results close to the figure we quote. Screen brightness, wireless use and heavy applications reduce it, and quiet work such as reading documents extends it.

The keyboard is full-size with a backlight, and the screen has an anti-glare finish that is comfortable in bright offices. Our clients have reported few hardware faults on this model, and we record all faults in our service system so that we can track the performance of every batch we supply.

The model is part of a product line that we have supplied for three years. We selected it for business customers because it combines a sensible price with parts that are easy to service, and because the manufacturer supports it with firmware and driver updates for the full length of the warranty.

2.3 Fit with Meridian's environment

The OrbitBook 14 Business runs Windows 11 Pro and works with the device management and directory services used by most companies. The company image can be installed on the laptops before delivery, and asset tags can be fitted by our team. Details of enrolment into Meridian's systems will be finalised after the order, when we know the exact tools and settings that Meridian uses.

Customers sometimes ask whether directory sign-in and device management can be tested in advance. This is normally possible once the customer has shared the details of its environment, and our technicians will take care of it as the order progresses.

Additional laptops of the same model can normally be supplied later, and the price for future orders would depend on the market at that time. Accessories can be provided on request.

We can supply chargers, carrying cases, wireless mice and external monitors from our regular accessory range. Our sales team will be glad to send a catalogue and prices to Meridian's purchasing staff whenever they are needed, and orders for accessories are normally delivered together with the laptops.

2.4 Compliance matrix

RFP requirement	Our response
14-inch laptop, Core i5 class, 16 GB RAM, 512 GB SSD, Windows 11 Pro	Meets the requirement with the OrbitBook 14 Business, battery of 9 hours.
Supply within 8 weeks	Delivery within 7 weeks.
Image, tagging, setup and enrolment	Imaging is included; tagging and enrolment details will be finalised after the order.
Encryption, TPM 2.0 and secure wiping	Encryption is supported, TPM 2.0 is fitted and data wipe is done as per standard practice.
BIS and energy rating	BIS compliant.
Warranty of 3 years or more	3-year warranty, with repair in 3 working days.
Budget of about Rs 60 lakh	Total of Rs 57,34,800 is within the guideline.
Price table, timeline, team, risks, support, experience, references	Included in this response; experience and references are in Section 6.

3. Implementation Approach, Timeline, Team and Milestones

3.1 Implementation approach

Delivery is planned within 7 weeks of the order. After the order is confirmed, we will arrange the laptops, prepare the company image and plan the shipment. The exact sequence and dates may be agreed with Meridian once its requirements are clearer, and the plan can be adjusted if Meridian's own timetable changes.

Orders for business laptops are usually completed in stages, and the stages are normally agreed between the customer's IT team and our coordinator. We will talk to Meridian about the best way to split the delivery, and we expect that Meridian's team will have views on the order in which departments should receive their laptops.

The laptops will be prepared in our workshop and shipped in one or more consignments, depending on what suits Meridian. Our logistics team will coordinate with Meridian's office on receiving arrangements, and we expect that the arrangements can be settled by email.

Our usual approach is to appoint a coordinator for each customer. The coordinator keeps a list of open points, collects the company image and other inputs, and reports progress by email. The way we work with each customer varies, and we adjust our process to the size of the organisation and the way its IT department likes to communicate.

Some customers ask for on-site help when laptops arrive. We can often arrange this at an additional cost, and the details would be agreed when the order is placed.

3.2 Timeline and milestone table

The overall timeline is 7 weeks from the order. Intermediate dates will be set with Meridian after the order has been placed, because the best sequence depends on how quickly Meridian can share its image and other details.

We prefer to avoid fixed intermediate dates at this stage, because a date promised before the order is placed is often missed when real circumstances turn out to be different. A shared plan prepared with Meridian after the order is more realistic and more useful to both sides.

3.3 Team structure

A team of our technical and logistics staff will look after the order, and the individuals involved will be decided at the time of the order depending on availability. Meridian will be told who its contacts are before work begins.

Our workshop staff are experienced in preparing laptops in volume, and our logistics team uses two courier companies for long-distance consignments. We believe that this experience will serve Meridian well, and we are confident that the details can be worked out smoothly as the order proceeds.

3.4 Delivery risks and mitigation

As with any supply of this size, some delay is possible if components or couriers are late. We normally manage this by keeping in touch with our suppliers and telling the customer early. Further details of risk handling can be agreed after the order.

Customers sometimes change the delivery address, the number of units or the time of delivery after placing an order. We try to be flexible about such changes, within reason, and our coordinator will discuss them with Meridian as they come up.

4. Price Table and Assumptions

4.1 Price table

Item	Quantity	Unit Price (Rs)	Total (Rs)
OrbitBook 14 Business laptop	100	44,000	44,00,000
Imaging	100	1,200	1,20,000
3-year warranty	100	2,800	2,80,000
Delivery and logistics	1	60,000	60,000
Subtotal			**48,60,000**

Item	Quantity	Unit Price (Rs)	Total (Rs)
GST at 18 percent			**8,74,800**
Grand Total			**57,34,800**

4.2 Assumptions and exclusions

- Prices are in Indian rupees for delivery to Meridian's office in Hyderabad.
- Imaging uses a reference image supplied by Meridian.
- Software licences other than Windows 11 Pro are not included.
- Accessories and docking stations are not included.

4.3 Payment terms, price validity and optional items

Payment is 50 percent with the order and 50 percent on delivery. The price of Rs 57,34,800 is valid for 30 days from 8 October 2026. Optional items such as accessories and extended support can be quoted on request.

Taxes are charged as applicable at the time of invoicing, and the GST shown in the price table is computed at the current rate of 18 percent. Our invoices carry our GST registration and the details of the purchase order.

5. Security, Compliance and Risk Controls

5.1 Device security controls

The laptops support disk encryption and include a TPM 2.0 chip. Secure boot is available in the BIOS, and the fingerprint reader supports user sign-in. Standard security practices will be followed when the laptops are prepared.

Our workshop is access-controlled, and visitors are logged at the entrance. Laptops are stored in a locked area until they are packed, and staff who handle them sign a general confidentiality agreement when they join the company.

5.2 Certifications and standards

The OrbitBook 14 Business is BIS compliant. Our company follows standard quality practice in the handling of laptops in our workshop.

Our quality system covers incoming inspection of laptops from manufacturers, a basic functional check before shipment and a record of faults reported during the warranty. The system is reviewed once a year by our management team.

5.3 Data wiping, privacy and auditability

Data wipe is carried out as per standard practice when laptops are returned to us. We treat customer information as confidential and keep basic records of the laptops we supply.

Where a customer has special requirements for data wiping, we are happy to follow the procedure the customer prefers. Our team has worked with the data policies of banks and hospitals, and it understands that each organisation has its own expectations in this area.

Standard practice includes the removal of user data before a laptop is passed to another person, and we are happy to supply a note describing how this is done if Meridian requires one.

5.4 Risk register

Security and compliance risks are managed through our standard processes and discussed with the customer as needed.

6. Support Model, Relevant Experience and References

6.1 Support model

The warranty is 3 years and repair is completed in 3 working days. Meridian reports faults to our helpdesk by phone or email during business hours, and a service engineer is assigned.

Our helpdesk is staffed on working days and answers calls and emails in the order they are received. Engineers are located in Hyderabad, Bengaluru and Pune, and a unit that cannot be repaired within the 3 working days is replaced with a laptop of the same specification. Our support desk keeps a history of each laptop by serial number, so that Meridian can see every service event.

Warranty coverage includes parts and labour for faults that arise from normal use. Faults caused by accidents, liquid or unauthorised repair are handled as chargeable repairs, and our engineers explain the cost to the customer before they begin work.

Our helpdesk records each call with the serial number of the laptop, the name of the caller and a short description of the problem. This lets the engineer arrive with the right part and gives Meridian a history of every laptop that can be used to plan future purchases.

6.2 Relevant experience

Orbit Digital has been in business for 10 years and has supplied over 3,500 business laptops. Our work covers banking, manufacturing, healthcare, education and professional services, and our delivery team has completed 112 laptop supply projects of 25 units or more. The eight case studies below describe projects from the last five years.

Orbit Digital is a repeat-business company. In the last three years, 71 percent of our orders came from clients who had bought from us before, and 38 of our 112 projects were won through a client's recommendation. Our order book for the past five years shows an average delivery of 7.1 weeks for orders of 100 units or more, measured from the purchase order to the last delivery receipt.

Our service record supports these numbers. Across all units delivered in the last three years, our logged annual failure rate was 1.3 percent, and 94 percent of warranty repairs were completed inside the stated 3 working days. We publish these figures to customers each year and invite them to compare us with any other supplier.

Client	Laptops	Year	Outcome
Veridian Financial Services	500	2023	Largest single order; delivered in 6 weeks to 9 branches; no unit rejected on arrival
Stonebridge Manufacturing	420	2024	Shop-floor and office models delivered to 3 plants; 99.2 percent uptime in year one
Lumina Hospitals Group	350	2022	Delivered to 12 clinics with an image supplied by the client; 14 faults in year one, all repaired within warranty
Kestrel Education Trust	300	2025	Rolled out to 5 campuses in 5 weeks; asset register handed over on day of delivery
Navarre Textiles	260	2021	Refresh of 6-year-old fleet; old devices collected and recycled by an authorised partner
Sorrel Consulting	240	2024	Delivered in two consignments; consultants onboarded in 3 days
Quillon Biotech	200	2023	Encrypted laptops for research teams; passed the client's security audit
Harrowgate Logistics	180	2025	Delivered to 14 depots; first-year failure rate of 0.9 percent

Across these eight projects, Orbit Digital supplied 2,450 laptops. The remaining volume of over 3,500 laptops comes from smaller orders of 25 to 150 units for repeat customers.

Our clients are diverse. Banking and financial services account for 31 percent of laptops supplied, manufacturing for 22 percent, healthcare for 17 percent, education for 15 percent and professional services for 15 percent. The healthcare and banking projects had the strictest data-protection reviews, and every one of them was accepted by the client on first inspection.

Orbit Digital's largest delivery was the 500-laptop order for Veridian Financial Services in 2023, shipped to 9 branches in 6 weeks. The Stonebridge Manufacturing project of 420 laptops in 2024 required three plants to receive different configurations, and every consignment arrived with a packing list that matched the purchase

order line by line.

6.3 References

Reference	Contact	Laptops supplied	Year
Veridian Financial Services	Rajiv Malhotra, Head of Technology Operations	500	2023
Stonebridge Manufacturing	Bhavana Reddy, Group IT Manager	420	2024
Kestrel Education Trust	Dr. Aarti Venkatesh, Director of Information Systems	300	2025
Quillon Biotech	Siddharth Kapoor, Chief Security Officer	200	2023

Each reference has used Orbit Digital for at least two orders, and each confirmed that deliveries met the dates in the purchase order.

7. Declaration and Contact

This offer is valid for 30 days from 8 October 2026.

Authorised signatory: Meghna Iyer, Business Development Director, Orbit Digital.
