Zenora Systems

Response to RFP MA-RFP-2026-017

Meridian Analytics Pvt. Ltd., Hyderabad - supply of 100 business laptops

Submission date: 4 October 2026

Contact: Pradeep Chowdhury, Commercial Manager | Email: pradeep@zenorasystems.example | Phone: +91 40 5550 5505

1. Executive Summary and Understanding of the Requirement

1.1 Summary of our offer

Zenora Systems offers Meridian Analytics Pvt. Ltd. 100 Zenora Z14 Business laptops, each with an Intel Core i5 processor, 16 GB of memory, a 512 GB SSD, a 14-inch display and Windows 11 Pro. Delivery is completed in 7 weeks from the purchase order. The total price is Rs 56,16,800 including 18 percent GST, which is Rs 3,83,200 below the Rs 60 lakh guideline.

Every charge is listed in Section 4. The price works out to Rs 56,168 per laptop, all taxes, freight, insurance, imaging, asset tagging and the 3-year warranty included. There are no hidden charges.

1.2 Our understanding of Meridian's requirement

Meridian is buying 100 laptops for new employees and wants a supplier who delivers inside 8 weeks, installs the company image, tags each device and enrols it into device management and directory sign-in. Meridian expects encryption and TPM 2.0, BIS registration and an energy rating, a 3-year warranty with repair times, and a price near Rs 60 lakh. It also asks for a price table, assumptions, a timeline, a team, risk controls, a support model, experience and references.

The cost of a laptop programme is more than the price on the first invoice. Spare batteries, freight, insurance and repair charges often appear later. Our response is written to show Meridian the whole cost of owning these 100 laptops for 3 years, and to make sure the finance team can approve the purchase with confidence.

1.3 Why choose us

Zenora Systems is a business-laptop supplier based in Hyderabad. We built our reputation on straightforward quotations: each line of a Zenora price table is a single charge, each assumption is written down and the final amount equals the sum of the lines. Customers use our quotations as the basis for their own budget approvals without needing to ask us follow-up questions.

Our quotation format has three rules. First, each charge has its own line, so that nothing is hidden inside a bundle. Second, quantities and unit prices are shown, so that the arithmetic can be checked with a calculator. Third, tax is shown separately, so that Meridian's accounts team can see what is price and what is GST.

The Zenora Z14 Business is a dependable mid-range laptop that meets the full specification. Together with the clear price, the 3-year warranty and a delivery plan inside the 8-week window, it gives Meridian a purchase that is easy to approve, easy to track and easy to audit.

Zenora Systems is a company of 24 people with a workshop, a small warehouse and a service centre in the same building in Hyderabad. Staying compact keeps our overhead low and lets us quote a price close to the manufacturer's trade price. We prefer to win customers through a fair quotation rather than through discounts that reappear as extra charges later.

2. Proposed Solution (Laptop Model and Specifications)

2.1 Laptop model and specification table

Component	Zenora Z14 Business specification
Processor	Intel Core i5-1235U, 10 cores
Memory	16 GB DDR4-3200, 2 slots
Storage	512 GB NVMe SSD

Component	Zenora Z14 Business specification
Display	14-inch Full HD IPS, anti-glare
Battery	8.5 hours in office use
Weight	1.5 kg
Ports	2 x USB-A, 1 x USB-C, 1 x HDMI, 1 x audio
Wireless	Wi-Fi 6 and Bluetooth 5.0
Operating system	Windows 11 Pro
Security hardware	TPM 2.0

2.2 Performance, battery life and build quality

The Zenora Z14 Business is a standard office laptop. Its Core i5 processor and 16 GB of memory run Microsoft 365, web applications and video calls without difficulty, and the NVMe drive starts the laptop quickly. The 8.5-hour battery covers a normal working day, and the laptop uses a USB-C charger.

The laptop is quiet in use. The cooling fan runs only when the processor is under load, and the surface remains comfortable during long sessions. The speakers are adequate for calls, and the webcam is built into the top of the screen with a 720p sensor.

The case is made of reinforced plastic with a metal hinge, and the keyboard is full size with a number pad. The display has an anti-glare finish. The laptop is not designed for harsh conditions, and it suits office and home-office use.

The keyboard has a standard layout with 1.4 mm key travel and the touchpad supports multi-finger gestures. The hinge opens to 180 degrees, so the laptop lies flat on a desk for shared screen reviews. The weight of 1.5 kg is acceptable for employees who carry their laptop between home and office.

2.3 Fit with Meridian's environment

The laptops run Windows 11 Pro. Zenora installs the company image supplied by Meridian, fits an asset tag and prepares the laptop for enrolment in Meridian's device management system. Directory sign-in is configured with the settings Meridian provides. A charger and a user card are packed with each laptop.

The user card carries the laptop's asset tag number, the helpdesk telephone number and the steps for reporting a fault. Packing is done in single boxes of 5 laptops, which makes the delivery easy to count at Meridian's reception. Boxes are marked with the range of asset tags inside them.

Meridian's finance team can match each asset tag number to the invoice lines. The 100 laptops, 100 imaging lines and 100 warranty lines in the price table correspond one-to-one with the serial numbers on the packing list.

Additional units of the Z14 Business can be ordered later. Zenora will quote the price at the time of the order, and the quotation will follow the same itemised format as this proposal.

Later orders benefit from the model's stable supply. The Zenora Z14 Business has been in our catalogue for 18 months, and our distributor holds regular stock. A repeat order normally ships within 4 weeks.

2.4 Compliance matrix

RFP requirement	Our response
14-inch, Core i5 class, 16 GB, 512 GB, 8+ hours, Windows 11 Pro	Complies. Zenora Z14 Business with 8.5 hours of battery life.
Delivery within 8 weeks	Complies. Delivery in 7 weeks.
Image, tagging, setup support, enrolment	Complies. Imaging and asset tagging are in the price; enrolment follows Meridian's settings.
Encryption, TPM 2.0 and wiping	Encryption and TPM 2.0 are provided.
BIS registration and energy rating	BIS registered.
3-year warranty with repair times	3-year warranty with carry-in repair within 5 working days.
Budget of about Rs 60 lakh	Complies. Total Rs 56,16,800, itemised in Section 4.
Price table, assumptions, timeline, team, support, references	Provided in Sections 3 to 6.

3. Implementation Approach, Timeline, Team and Milestones

3.1 Implementation approach

After the purchase order, Zenora orders the laptops, receives Meridian's company image, prepares the laptops in our Hyderabad workshop, tags them and ships them to Meridian. The laptops are delivered in 7 weeks. Meridian's IT team checks the delivery against the packing list and signs the receipt.

The Week 5 milestone is the end of workshop preparation. Laptops are imaged in groups of 20, tested for start-up, wireless and battery charging, and given an asset tag from the series that Meridian specifies. Prepared laptops are stored in our locked stockroom until the courier collects them in Week 7.

Our delivery coordinator, Alisha Dsouza, is the contact for questions during the project. She sends a short progress note every week and tells Meridian immediately if a date is at risk.

3.2 Timeline and milestone table

Milestone	Week	Deliverable
Order and image receipt	1	Purchase order and company image received
Preparation and tagging	5	Laptops imaged and tagged
Delivery	7	All 100 laptops delivered to Meridian

3.3 Team structure

The project is run by Alisha Dsouza, who coordinates the workshop and the courier. Technical staff from our workshop prepare the laptops. Meridian has one point of contact throughout.

Our workshop team of 6 technicians has prepared fleets for several customers. One senior technician checks each batch of 20 laptops against the image and the asset list before it is released for packing. Meridian's IT staff can visit the workshop during Week 5 to see the laptops being prepared.

3.4 Delivery risks and mitigation

The main risk for any laptop order is a delay in stock or transport. We place the order with our distributor on the day we receive the purchase order and book the courier in advance. If a delay appears, the coordinator informs Meridian immediately.

Insurance is part of the price. Every shipment is insured for its full value during transit, and a claim for a damaged parcel is handled by Zenora without any extra charge to Meridian. A replacement laptop for transit damage is prepared and shipped as soon as the damaged laptop has been inspected.

4. Price Table and Assumptions

4.1 Price table

Item	Quantity	Unit Price (Rs)	Total (Rs)
Zenora Z14 Business laptop	100	44,000	44,00,000
Imaging and asset tagging	100	1,000	1,00,000
3-year warranty with carry-in repair	100	2,200	2,20,000
Freight and insurance	1	40,000	40,000
Subtotal			**47,60,000**
GST at 18 percent			**8,56,800**
Grand Total			**56,16,800**

The total of Rs 56,16,800 is the sum of four lines. The laptops cost Rs 44,00,000, imaging and asset tagging Rs 1,00,000, the 3-year warranty Rs 2,20,000 and freight and insurance Rs 40,000. The subtotal is Rs 47,60,000, GST at 18 percent is Rs 8,56,800 and the Grand Total is Rs 56,16,800.

The table below shows how GST applies to each charge, so that Meridian's finance team can reconcile every invoice line.

Each line has a clear meaning. The laptop line is the unit price of the Zenora Z14 Business multiplied by 100. The imaging and asset tagging line covers the installation of Meridian's image and a numbered metal-foil tag on every laptop. The warranty line pays for 3 years of carry-in repair, including parts and return courier. The freight and insurance line is a single charge for transport from our workshop to Meridian's office and for transit insurance.

Charge	Basis	Before GST (Rs)	GST 18 percent (Rs)	With GST (Rs)
Zenora Z14 Business laptop	100 x 44,000	44,00,000	7,92,000	51,92,000
Imaging and asset tagging	100 x 1,000	1,00,000	18,000	1,18,000
3-year warranty with carry-in repair	100 x 2,200	2,20,000	39,600	2,59,600
Freight and insurance	Lump sum	40,000	7,200	47,200
Total		47,60,000	8,56,800	56,16,800

Three-year total cost of ownership is shown in the next table. The 3-year warranty is already inside the price, so Years 1 and 2 carry no repair cost. The only item that is not in the order total is an optional battery replacement that we estimate for Year 3.

Period	Item	Amount (Rs)
Year 0	Purchase, imaging, tagging, warranty and freight, including GST	56,16,800
Year 1	Recurring charges: none, warranty prepaid	0
Year 2	Recurring charges: none, warranty prepaid	0
Year 3	Optional battery replacement estimate: 30 units x 3,800 = 1,14,000, plus GST of 20,520	1,34,520
3-year total	Purchase plus optional battery replacement	57,51,320

The battery estimate assumes that 30 of the 100 laptops need a new battery in Year 3 at Rs 3,800 per battery. It is an estimate for planning and is invoiced only for batteries that are actually replaced.

Meridian can also see from the table that the 3-year cost of ownership is within the Rs 60 lakh guideline even when the optional battery line is included. The Year 3 estimate is deliberately cautious, because lithium batteries in office use normally keep at least 80 percent of their capacity after 3 years of daily charging.

4.2 Assumptions and exclusions

- All prices are in Indian rupees and include delivery to one address in Hyderabad.
- GST is charged at 18 percent on every line and is shown in the table above.
- The unit price of the laptop includes Windows 11 Pro and the manufacturer's standard charger.
- Meridian supplies the company image, device management token and directory settings by the end of Week 2.
- Imaging covers one image for one hardware model; a second image is quoted separately.
- The warranty covers hardware faults arising from normal use, and the carry-in service is done at our Hyderabad service centre.
- Accidental damage, liquid damage, theft and loss are excluded from the warranty.
- Battery replacement is outside the warranty after 12 months, and the replacement price is shown in the cost of ownership table.
- Meridian is responsible for receiving the laptops at its office and for signing the delivery receipt.
- Software other than Windows 11 Pro, including antivirus and office applications, is not included.
- Courier delivery to locations outside Hyderabad is quoted separately.
- Delivery dates in Section 3 count from the date we receive the purchase order and the company image.

4.3 Payment terms, price validity and optional items

The payment schedule has three parts and is shown in the table below. Amounts include GST and are calculated on the Grand Total. Each invoice is payable within 7 days of issue.

The 10 percent final payment is released only after the 15-day acceptance period has passed without an open defect on the delivered laptops. During those 15 days Meridian's IT team checks the laptops, and any laptop that fails a check is repaired or replaced at no cost before the final payment falls due.

Payment	Share	Amount (Rs)
With the purchase order	30 percent	16,85,040
On delivery of all 100 laptops	60 percent	33,70,080
After 15-day acceptance period	10 percent	5,61,680

There are no hidden charges. Every cost that Zenora will bill for this order is in the price table or in the optional battery line above. Our quotation is valid for 45 days from 4 October 2026, and optional items are limited to battery replacement and extra on-site days at Rs 6,500 per engineer-day plus GST.

Price changes after order are limited. If Meridian asks for a change that affects the price, for example a second image or delivery to a second address, we issue a written quotation with the same itemised layout and wait for Meridian's approval before we proceed. Nothing is added to an invoice that Meridian has not approved in writing.

5. Security, Compliance and Risk Controls

5.1 Device security controls

The Zenora Z14 Business supports disk encryption and includes TPM 2.0. Encryption is turned on when the laptop is prepared in our workshop.

The recovery key for each laptop is stored by the person who sets up the laptop with Meridian's IT team. The TPM chip is switched on in the BIOS, and the BIOS is protected with a password supplied by Meridian.

5.2 Certifications and standards

The laptop is BIS registered. The registration covers the safety requirements for information technology equipment sold in India.

The BIS registration number is printed on the label under each laptop and appears in the manufacturer's documents that come with the delivery.

5.3 Data wiping, privacy and auditability

We treat customer images and settings as confidential and use them only to prepare Meridian's laptops.

5.4 Risk register

Security risks are limited by the encryption and TPM features described above.

6. Support Model, Relevant Experience and References

6.1 Support model

The warranty runs for 3 years. Repairs are carried in: Meridian brings or ships the laptop to our Hyderabad service centre, and we repair it within 5 working days of receipt. Our helpdesk takes calls and emails on working days from 9 am to 6 pm.

Faults are logged by serial number. The service centre tests each repaired laptop before it is returned. Meridian can contact the coordinator, Alisha Dsouza, for anything the helpdesk cannot settle.

Our service centre is open from 9 am to 6 pm on working days and keeps spare parts for the Z14 Business in stock. Common repairs such as a keyboard, a screen or a charger are completed in 2 to 3 days. Laptops are returned by courier at Zenora's cost during the warranty period.

6.2 Relevant experience

Zenora Systems has supplied business laptops since 2019 to small and medium-sized companies in Hyderabad and Vijayawada. Our typical order is 30 to 80 laptops, and the transparent price table in this proposal is the format we use for every customer.

Since 2019 we have supplied about 650 business laptops in total, to customers in logistics, engineering, accounting and education. We have never had an order cancelled because of a late delivery. Customers who return to us usually tell us that the clarity of our price and the speed of our answers were the reasons.

6.3 References

Client	Laptops supplied	Year	Contact
Pioneer Engineering Works	60	2025	Chandana Rao, Accounts Manager
Greyhound Analytics Pvt. Ltd.	45	2024	Tushar Menon, Office Manager

7. Declaration and Contact

This offer is valid for 45 days from 4 October 2026.
